

## H<sub>2</sub>S AND BREATHING APPARATUS

The program will cover the attached topic in professional ways by top instructors' quality in Egypt and Middle East.

**Duration:** One Day  
**Location:** Your organization.

**Intended for:** All personnel who, in the normal course of their duties may be exposed to hazard Hydrogen Sulphide Gas (H<sub>2</sub>S)

### Overview

H<sub>2</sub>S training is required for anyone working in the oilfield or petrochemical industry. Hydrogen Sulfide training is required for all workers involved in oil exploration, production and refining. In order to work safely around hydrogen sulfide, you must be aware of its properties and characteristics. This H<sub>2</sub>S Training program teaches how to recognize when Hydrogen Sulfide is present in the work area and take necessary precautions to work with Hydrogen Sulfide safely.

**Aim:** To give personnel the necessary training and skills to respond correctly and safely in the event of a release of hydrogen sulphide gas.

**Objectives: By the end of the course, delegates will be able to:-**

1. Describe the physical properties and hazards of H<sub>2</sub>S.
2. Safely don and start up self-contained breathing apparatus (B.A.).
3. Demonstrate the ability, while wearing B.A. as a member of a team, to carry out a snatch rescue of an unconscious person
